

# WATCHES

## The Timekeepers

### MEETING OF THE MINDS

With a name meaning "masters of time," **MAÎTRES DU TEMPS** should be synonymous with innovation. And that's exactly what industry veteran Steven Holtzman intended when he founded the company, in 2005, inviting well-known watchmakers to collaborate on one exceptional piece, or "chapter," at a time. The latest creation, by Peter Speake-Marin and Daniel Roth (above, from left), is said to be the world's most legible mechanical triple-calendar wristwatch. Right: Chapter Two Big Date Triple Calendar in 18k red gold on alligator strap (\$72,000), limited edition of fifty, at Cellini, NYC, 212-751-9824.
