

LUXEFINDER

COMPLICATED

The tourbillon movement incorporates a monopusher column-wheel chronograph, retrograde date and retrograde GMT functions, moon phases and day-of-the-week indication. The combined complications comprise 558 parts.

INNOVATIVE

The rolling bar display is a distinctive characteristic of the Chapter One. A rolling bar between the lugs at 6 displays the day, while a matching rolling bar at 12 indicates the phases of the moon with precision.

OPEN BOOK

The ease of reading and adjusting an impressive roster of indications is primary in the design of the limited edition Chapter One Round by Maitres du Temps. \$470,000, 570.970.8888, maitresdutemps.com
